

1 I claim:

2 1. A medicament for the treatment of vulvodynia comprising:

3 a therapeutic dosage of a calcium channel blocker agent;

4 a vaginal suppository member in which said therapeutic

5 dosage form is encased.

6

7 2. The medicament of Claim 1 wherein said calcium channel

8 blocker agent is a benzothiazepine calcium channel

9 blocker.

10

11 3. The medicament of Claim 2 wherein said calcium channel

12 blocker agent is Diltiazem Hydrochloride.

13

14 4. A method for treating vulvodynia comprising the steps of:

15 selecting a dosage form comprising:

16 a therapeutic dosage of a calcium channel blocker

17 agent;

18 a vaginal suppository member in which said

19 therapeutic agent is encased;

20 administering said dosage form at least once daily until

21 symptoms are reversed.

22

5. The method of Claim 4 wherein said calcium channel blocker agent is a benzothiazepine calcium channel blocker.

6. The method of Claim 5 wherein said calcium channel blocker agent is Diltiazem Hydrochloride.

7. The medicament of Claim 3 wherein said therapeutic dosage is approximately 50 mg.
